Direction (25-30): Read the following passage & answer.

There was a girl who sang beautiful at the temple every morning. The music master used to happily recall "one day when I went into the woods to pluck flowers, found this baby under a pipal tree." He picked her up carefully, raised her lovingly as if she was his daughter and taught her to sing before she spoke her first word.

The music master grew old and didn't see too well. The girl tended to him caringly. many people including young men travelled from far and wide to hear her sing. This made the music master's heart quake with fear. "you will choose one of them as your husband. what is to become of me?"

The girl replied, "I shall not be apart from you." But on a full moon night during the harvest festival, the master's chief disciple touched his feet reverently and said "master grant me your permission for your daughter has agreed to marry me." The master's tears followed freely. "she has chosen well. Go and fetch her, let me hear you sing the first of many melodies that you will sing together." The two began to sing in harmony. But the song was interrupted by the arrival of the royal messenger. "your daughter is very fortunate the king has sent for her". The messenger said at the place the queen summoned the girl to her and said, "I place upon you the honour of making sure my daughter is never unhappy at her husband's home." There wasn't a single tear in the girl's eyes but she thought of the master and her heart was heavy.

That very night the princess began her journey to Kambhoj. The princess's royal chariot led the procession and the girl's palanquin followed close behind carrying trunks of ~~stiff~~ silks, Jewellery and precious stones. It was covered with a velvet sheet and had soldiers on both sides.

As the procession passed, the master and his disciple Kumarsen stood still by the wayside. A collective sigh escaped the crowd gathered there wishing that the princess wouldn't feel homesick in her faraway home.

Direction (56-60): Read the information and answer.

Twelve people are sitting in two parallel rows containing six people each, in such a way that there is equal distance between adjacent persons in row-1 - A, B, C, D, E and F are seated and all of them are facing south. In row-2 - P, Q, R, S, T and U are seated and all of them are facing north. Therefore in the given seating arrangement each member seated in a row faces another member of the row (note: none of the information given is necessarily in the same order.)

D sits fourth to the right of B. Only two people sit between the one who faces D and T. T faces an immediate neighbour of F. F sits second to the left of A. Neither A nor F sit at an extreme end of the row. The one who faces F sits third to right of U. Only three people sit between U and P. R is neither an immediate neighbour of U nor T. Q sits third to the left of R.

56. What is the position of Q with respect to P?
- 1) second to the left 2) fourth to the left
3) third to the right 4) second to the right 5) fourth to the right.
57. Who among the following is facing S?
- 1) B 2) E 3) A 4) F 5) D

58. Who among the following is facing C?

- 1) Q 2) R 3) T 4) U 5) P

59. Which of the following statements is true as per the given arrangement?

1) Only one person sits between U and T.

2) F sits to the immediate left of E.

3) S faces one of the immediate neighbours of F.

4) None

5) D is an immediate neighbour of B.

60. Four of the given five are alike in a certain way based on the given arrangement. Which does not belong to that group?
