New Delhi: Indian Overseas Bank (IOB) Saturday reported narrowing of its net loss to Rs 1,985.16 crore in the quarter ended March 2019 on account of declining bad loans. It had posted a loss of Rs 3,606.73 crore during the January-December quarter of 2017-18. PTI

## NEW HIKE IN TARIFFS TO BE APPLICABLE ON GOODS WORTH NEARLY \$300 BN

# Trump orders increasing tariffs on remaining imports from China

On Twitter, US President asks American companies to make products at home "to avoid tariffs"

LALITKJHA& **KJMVARMA** 

WASHINGTON/BEIJING, MAY 11

US PRESIDENT Donald Trump ordered a tariff hike on almost all imports from China after the latest round of talks to end the trade war between the world's two largest economies ended on Friday without a deal, even as Beijing said the negotiations have not broken down and it is cautiously optimistic to reach an agreement.

Expected to further escalate the trade war between the United States and China, Trump's latest move came less than a day after he ramped up punitive duties on \$200 billion worth of Chinese imports, raising them to 25 per cent from 10 per cent, and Beijing vowed to retaliate. The new increase applies to an

even greater value of goods – put at about \$300 billion.

US Trade Representative ment that Trump had "ordered us to begin the process of raising tariffs on essentially all remaining imports from China.'

"Earlier today, at the direction of the President, the United States increased the level of tariffs from 10 per cent to 25 per cent on approximately \$200 billion worth of Chinese imports," Lighthizer said.

"The President also ordered us to begin the process of raising tariffs on essentially all remaining imports from China, which are valued at approximately \$300 billion," he said.

The process for public notice and comment will be published shortly in the Federal Register. "The details will be on the USTR website on Monday as we begin the process prior to a final decision on these tariffs," Lighthizer said. Meanwhile, on Saturday, th US

US Treasury Secretary Steven Mnuchin (centre) and Trade Representative Robert Lighthizer (left) walk to the White House following negotiations on the second day of last ditch trade talks in Washington, US, on Friday. Reuters

President said that firms could easily avoid additional costs by producing goods in the US.

"Such an easy way to avoid Robert Lighthizer said in a state- Tariffs? Make or produce your goods and products in the good old USA. It's very simple!" he said Saturday on Twitter, echoing a similar message he sent Friday and even retweeted.

The latest Trump move came as China's top trade negotiator, Vice Premier Liu He, on Friday concluded his two days of trade talks with the US team led by Lighthizer. The 11th round of talks in Washington ended Friday with no deal, but the Chinese vice premier said the negotiations have not broken down.

"Negotiations have not broken down. Quite the opposite. I think they are normal. Small setbacks are inevitable in bilateral negotiations. Looking ahead, we are cautiously optimistic about the future," the Hong Kong-based South China Morning Post quoted him as saying. "Both sides agree they will

meet again in Beijing in the future and keep pushing forward the negotiations," he said without giving a date.

Earlier, in a series of tweets. Trump described the talks as candid and constructive, but indicated taking a tough approach against massive imbalance of trade with China.

"Over the course of the past two days, the United States and China have held candid and constructive conversations on the status of the trade relationship between both countries," Trump had said on Friday, praising his relationship with Chinese President Xi Jinping and saying the negotiations would carry on.

"In the meantime, the US has imposed Tariffs on China, which may or may not be removed depending on what happens with respect to future negotiations!" Trump said. He said tariffs will bring in "far more" wealth to the US than even a phenomenal deal of the traditional kind.

Trump said he is in no rush to conclude trade talks with China.

"Talks with China continue in a very congenial manner - there is absolutely no need to rush - as Tariffs are NOW being paid to the United States by China of 25 per cent on 250 Billion Dollars worth of goods & products. These massive payments go directly to the Treasury of the US...," he said.

"We have lost 500 Billion Dollars a year, for many years, on Crazy Trade with China. NO MORE!"Trump said.

In a transcript of the press interview published on the website of Phoenix Television, a Hong Kongbased broadcaster, Chinese Vice Premier Liu said there were several issues on which the two sides still disagreed. "China believes tariffs are the starting point of the bilateral trade disputes. If a deal is to be reached, the tariffs should all be eliminated. This is the first point," Liu said.

The second is related China's promise to buy more goods from

the US, he said. "While an initial deal was reached when Chinese President Xi and US President Trump met in Argentina in December, the two sides now held different views on what had actually been agreed," Liu said. "This is a very serious issue," he said, adding that the deal had to be both balanced and fair.

NEW DELHI, MAY 11

TAKING FORWARD a pilot project

in Patna that started last

September, US technology major

Google will expand its artificial in-

telligence-based flood detection

and alerting system for the up-

coming monsoon season that will

cover areas along the Ganga and

Brahmaputra rivers. Under its pi-

lot project, Google had partnered

with India's Central Water

Commission to collect data for its

models that it claims predict the

impact of floods more accurately.

230 million people across the

world — more than storms and

earthquakes combined. Twenty

per cent of flood fatalities happen

in India alone ... and without con-

sistent accurate warning systems,

people are prone to ignore warn-

ings and be unprepared. That's es-

pecially detrimental in areas hit

with annual monsoons ... the ex-

panded area will cover millions of

"Not only are we increasing

the area of coverage, but we are

also better forecasting where the

floods will hit hardest. Through a

new version of our public alerts,

people can better understand

whether they will be affected," Jeff

Dean, Google's head of AI division,

said earlier this week at the com-

pany's annual developer confer-

ence in San Francisco, California.

Meteorological Department

(IMD), monsoons in India during

2019 will be near-normal. Further,

as per the department's monsoon

forecast, rainfall will be well dis-

tributed across the country. The

south-west monsoon makes its

onset over India around May-end.

people living along the Ganges

and Brahmaputra river areas.

"Every year, they affect up to

"It was a matter of principle that the two sides were not only cooperative but also respectful of one another," Liu said.

Liu said that the trade negotiators on both sides of the table had shown they were sincere in their efforts to tackle problems and resolve differences, but reaching a deal was not a short or easy process.

Trump earlier justified the move by saying Beijing had delayed the process of reaching a trade deal by reneging on commitments it had made during months of negotiations.

Chinese state media, meanwhile, on Saturday took a defiant stance on Washington's latest efforts to increase the pressure on Beijing. "China requires that all tariffs be eliminated to restore normal bilateral trade," *People's Daily*, the mouthpiece of the Communist Party, said in a commentary.

"The trade procurement figures should be realistic, the text must be balanced and expressed in a way that is acceptable to the Chinese people and does not undermine the country's sovereignty and dignity," it said.

Trump is demanding China to reduce the massive trade deficit which last year climbed to over \$539 billion. He is also pressing for verifiable measures for protection of intellectual property rights (IPR), technology transfer and more access to American goods to Chinese markets. **PTI** 

#### **MAP TO INDICATE RISK AREAS**

Will now cover areas along Ganga and Brahmaputra rivers

Google's AI-based flood

detection & alert system

to expand its coverage

■ During the pilot project last September, Google exhibited, via Public Alerts, a map that included areas designated as 'high risk', 'medium risk' and 'low risk' and across these different alert types after this year's heavy post-monsoon rains, which Google says recorded "high accuracy metrics"

■ However, effective riverine flood forecasting at scale is hindered by a number of factors, such as the need to rely on human calibration in current methodology, limited data for a specific location, and computational difficulty of building continent level models that are sufficiently accurate

EXPLAINED

It then uses neural networks to correct the terrain, making it more accurate, after which it simply applies physics to simulate how flooding will happen.

However, effective riverine flood forecasting at scale is hindered by a number of factors, with the biggest factor being the need to rely on human calibration in current methodology, limited amount of data for a specific location, and computational difficulty

of building continent level mod-

Record 1,818 kg pseudoephedrine

els that are sufficiently accurate.

Google said it has collaborated with the government to collect up-to-date stream gauge data and accordingly sends out real-time updates.

During the pilot project, Google exhibited, via Public Alerts. a map that included areas designated as 'high risk', 'medium risk' and 'low risk' and across these different alert types after this year's heavy post-monsoon rains, which Google says recorded "high accuracy metrics".

The pilot used an operational hydro-dynamic model, with the explicit goal of preparing the ground for integrating machine learning (ML) models into the process. Alerts were then sent out to individuals in the catchment area in the form of maps and Android notifications. Patna was chosen for the pilot as the city, and its surrounding area, has a large population and has one of the most frequent occurrences of severe riverine flooding.

"After we sent out the alerts, this allowed us to look into how people experience and interact with the alerts we send. One example of this is that we've realised that many people who receive these alerts prefer a stronger emphasis on text that describes the same information our maps show," Sella Nevo from Google's Research and Machine Intelligence team, had said.

In the early stages of the Patna pilot, where a lot of time was spent understanding the needs of people in the area, as well as the river morphology and conditions on the ground, a big learning for Google was that people who received these alerts preferred a stronger emphasis on text that described the same information that Google's maps showed.

"This allowed us to be relatively confident that our pilot will already have a significant impact and will also be informative as we prepare to scale our efforts up .. Our alerts, though limited in scope for our first pilot, achieved results we're happy with," Nevo had said

#### 'INDIA REMAINS AHEAD OF USA IN CRUDE STEEL PRODUCTION'

India was the second largest producer of crude steel in the world, with 27.3 million tonnes (MT), followed by Japan (25 MT) and USA (22.2 MT), in the first three months of calendar year 2019, a report by Care Ratings said

#### **Factors supporting India's** steel production:

- Growing consumption, with CAGR of 6.1 per cent between FY15 and FY19
- Supportive government policies like minimum import price and antidumping policy to limit steel
- Low average import penetration rate; falling from 10.7% in FY11-FY16 to 8% in FY19

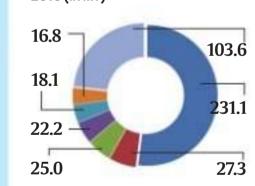

Total world crude steel production increased by 4.5 per cent year-on-year to 444.1 MT during the period January-March 2019. Of the total output in this period, China accounted for the largest share of 52 per cent, producing 231.1 million tonnes of crude steel

#### CRUDE STEEL PRODUCTION OF INDIA AND USA (IN MILLION TONNES)

	Year	India	USA	India exceed USA by
	2013	81.2	87	-5.8
	2014	87.3	88.2	-0.9
	2015	89.6	78.9	10.7
	2016	95.5	78.5	17
	2017	101.5	81.6	19.9
	2018	106.5	86.7	19.8
	2019 (Jan-Mar)	27.3	22.2	5.1
Source: World Steel Association				

#### **COUNTRY-WISE CRUDE STEEL** PRODUCTION FOR JANUARY-MARCH 2019 (IN MT)

■ China ■ India ■ Japan ■ USA ■ South Korea ■ Russia ■ Others

Source: World Steel Association

#### **Factors affecting steel** production in the US:

- Surging imports, starting with near-record high import of 40.3 MT in 2014
- High average import penetration rate; rising from 30.1% in 2011-2016 to 33.8% in 2019

# seized from Greater Noida: NCB **ENSECONOMIC BUREAU**

NEW DELHI, MAY 11

IN THE biggest ever seizure of pseudoephedrine outside factory premises, the Narcotics Control Bureau (NCB) Saturday said it has seized over 1,818 kg of pseudoephedrine and 1.9 kg of cocaine from a house in Greater Noida.

Pseudoephedrine, a precursor to methamphetamine, is widely used in Europe and South East Asia. The agency got the record haul after interrogating a South African woman, arrested on May 9 from IGI Airport for allegedly carrying 24.7 kg of pseudoephedrine. The woman was first intercepted by the Central Industrial Security Force (CISF).

"This is the biggest-ever seizure of pseudoephedrine in

India kept outside factory premises. As per our records, this is the highest-ever seizure by any agency," the NCB said.

The woman's interrogation led officials of NCB's Delhi zonal unit to a house in Greater Noida, with the help of electronic surveillance. Two Nigerian nationals, a man and a woman, were arrested from the house under relevant sections of the Narcotic Drugs and Psychotropic Substances (NDPS) Act. While NCB is yet to ascertain the market value of the drugs, the haul is claimed to be worth many "crores", an official said.

Noida Police, meanwhile, said they will probe how such a large quantity came to be stored inside the house. "The raid was conducted by the Narcotics Bureau and they have leads with regards to the investigation. We will look

into tenant verification and other angles," Gautam Buddha Nagar SSP Vaibhav Krishna said. On April 10, NCB Bengaluru

had seized 26.75 kg of Ketamine a psychotropic substance scheduled under the NDPS Act from a man from Chennai. When his house in R R Nagar was searched a lab manufacturing ketamine was found in the basement. A note counting machine was also recovered, officials said.

Further investigations by the agency led them to a manufacturing unit in Hyderabad. When NCB officials raided a premise in Hyderabad on May 2, they found a clandestine illegal drug manufacturing unit. A total of 477 kg of white crystalline powder, believed to be ketamine, was recovered and 281 kg of intermediate material was also seized, NCB said

# US states file lawsuit accusing Teva, 19 others of price-fixing

**REUTERS** WASHINGTON, MAY 11

US STATES filed a lawsuit accus-

ing Teva Pharmaceuticals USA Inc of orchestrating a sweeping scheme with 19 other drug companies to inflate drug prices sometimes by more than 1,000 per cent — and stifle competition for generic drugs, state prosecu-

tors said on Saturday. Soaring drug prices from both branded and generic manufacturers have sparked outrage and investigations in the United

The criticism has come from across the political spectrum, from President Donald Trump, a Republican, to progressive Democrats including US Senator Elizabeth Warren, who is run-

ning for president. The 20 drug companies en-

gaged in illegal conspiracies to divide up the market for drugs to avoid competing and, in some cases, conspired to either prevent prices from dropping or to raise them, according to the complaint by 44 US states, filed on Friday in the US District Court in Connecticut.

A representative of Teva USA, a unit of Israeli company Teva Pharmaceutical Industries Ltd, said it will fight the lawsuit. "The allegations in this new

more generally, are just that – allegations," the company said in a statement. "Teva continues to review the issue internally and has not en-

gaged in any conduct that would

complaint, and in the litigation

lead to civil or criminal liability." The 500-page lawsuit accuses the generic drug industry, which mainly sells medicines that are off patent and should be less expensive, of a long history of discreet agreements to ensure that companies that are supposedly competitors each get a "fair share." The situation worsened in

2012, the complaint said.

"Apparently unsatisfied with the status quo of 'fair share' and the mere avoidance of price erosion, Teva and its co-conspirators embarked on one of the most egregious and damaging pricefixing conspiracies in the history of the United States," the complaint said.

With Teva at the center of the conspiracy, the drug companies colluded to significantly raise prices on 86 medicines between July 2013 and January 2015, the complaint said.

Representatives of Sandoz, another company named in the lawsuit, did not immediately respond to a request for comment.

# US prosecutors say Huawei lawyer's prior work at Justice Dept poses conflicts

**REUTERS** WASHINGTON, MAY 11

**HUAWEI TECHNOLOGIES Co Ltd** lawyer James Cole's prior work at the US Department of Justice created conflicts of interest that should disqualify him from defending the Chinese company in a case of alleged bank fraud and sanctions violations, US prosecutors said in a filing on Friday.

Last week, the prosecutors filed a motion to disqualify Cole, who served as deputy attorney general, the No. 2 official at the Justice Department, between 2011 and 2015. But the motion was sealed and classified, and prosecutors did not make public the reasons behind the move.

"There is a 'substantial risk' that Cole could use 'confidential factual information' obtained

while serving as DAG to 'materially advance' Huawei's current defense strategy," the prosecutors said, as per a redacted copy of the US motion filed on Friday in US District Court in Brooklyn. Cole was not immediately available for comment, but in a statement Huawei said the US wants to strip the firm of counsel of its choice while concealing the facts on why.

"The Justice Department's motion to disqualify Jim Cole makes a mockery of the adversarial process," the statement said. "The government has known

since 2017 that Mr. Cole represented Huawei in this matter. Now, two years later, not only does the Justice Department seek to strip Huawei of counsel of its choice, but it does so while concealing from Huawei and the public virtually all of the facts on which it bases its motion."

## Thyssenkrupp agrees on restructuring approach with labour leaders

Frankfurt: Management and labour leaders at Germany's Thyssenkrupp have agreed on a way forward after the industrial conglomerate announced a fresh restructuring drive that could lead to the loss of 6.000

Agreement was reached in talks between management and workers overnight on recognising the need for radical action, whilst ensuring fair treatment of employees at the Essen-based group, both sides said.

The company's chief executive officer Guido Kerkhoff announced the overhaul on Friday, ditching plans to split the business into two and abandoning a European steel merger with India's Tata Steel. **REUTERS** 

## As France probes Monsanto file, Bayer says it won't accept 'unethical behaviour'

**REUTERS** FRANKFURT. MAY 11

BAYER SAID on Saturday it did not accept "unethical behaviour" following a French investigation into a suspected file assembled by the German company's seed making unit Monsanto to influence various personalities in France.

The French prosecutor said on Friday it had opened the probe after a complaint was filed by daily newspaper Le Monde.

According to the newspaper and other French media, Monsanto built up a file of some 200 names that includes journalists and lawmakers in the hope of influencing their positions on pesticides. The file, Le Monde reported, dates from 2016 and was leaked by FleishmanHillard, a US PR and marketing agency.

As per French media, Monsanto built up a file of some 200 names, including journalists and lawmakers, hoping to influence their positions on pesticides

In an emailed statement, Bayer declined to comment on the investigation, saying it did not know which documents the allegations referred to. "We stand for openness and a fair treatment of all interest groups. We do not accept any unethical behaviour in our company," it said. "That applies obviously for the data privacy regulations in the respective countries as well."
