What are the things contained in the waste basket?

MODEL QUESTIONS

Directions: Read the following passage and answer the questions that follow.

Rapid Industrialization has resulted in the deterioration of air and water qualities. Utilization of coal as fuel and the incomplete combustion of it gives out soot, sulphur and other compounds into the atmosphere. The rapid increase in the number of motor-cars, trucks and other engines that use petroleum fuels have added a new dimension to the urban air pollution. This will go on increasing. The hydro carbon and other toxic chemicals emitted during peak hours by motor vehicles have resulted in air pollution levels that endanger health. The operation of coal and oil burning electric power plants have added strength to the pollution. The

industrial revolution and our modern civilization has turned the air we breathe into a waste basket in which dust, noxious fumes, toxic gases, mist, odour and smoke are thrown.
