Woman, 65, killed by leopard in Raiwala

23rd Death In Conflict Zone In Five Years

Haridwar: A 65-year-old woman was attacked and killed by a leopard in Raigwala area of Motichur range on Saturday. The incident took place when Phula Devi - aresident of Vaidik Nagar - took her cattle for grazing in the forest. Incidentally the stretch between Motichur Kansro and Nepali farm is notorious for leopard-human conflict. In the past five years, more than 20 people have been killed by leopards in this area.

The growing leopard population has made them stray from the forest land. Around eight leopards have beer captured over the past five years. They were later released into other forest areas. Three we moved to Chidiyapur rescue centre

According to Phula's fam-members, she was told not ever, refused. Her body was later found by forest guards along with villagers at 11 am

The 7 to 8 km stretch from Motichur Kansro to Nepali farm is a risky one due to a sizeable leopard population, experts and forest department officials said. The stretch has around 8 to 10 villages, namely Raiwala, Haripur Kalan, Prateet Nagar and Motichur. All these areas share its border with Moti. share its border with Moti-chur range. So far, three deaths have been registered from the stretch this year. In

Backhanded compliments and constant criticism are emotionally hurting your partner

Does your partner complain that you are constantly putting her down? That your compliments are back-handed or sound more like insults? or sound more like insults?
Therapists say that you could be resorting to a new form of emotional manipulation — one emotional manipulation — o that is popularly termed as 'negging'. When a person is negging you, it's because the want to undermine your confidence so they can feel

Deepfakes are a costly threat, but cheap and easy 'dumbfakes' may be worse

Efforts to debunk fake videos may be futile due to the rapid spread of simpler dumbfakes online

Sophisticated phoney videos called deepfakes have attracted pienty of attention as a possible threat to elect integrity. But a bigger problem for the 2020 US presidential context may be 'dumbfakes' that are easy and often

cheap to produce. Unlike depfakes, which require sophisticated artificial intelligence, audio manipulation and facial mapping technology, dumbfakes can be made simply by varying the speed of the video reslective editing. They are easier to create and can be convincing to an unsuspecting viewer, which makes them a more immediate worry.

Not just a garment

The interview with saree researche Nikaytaa ('A hashtag cannot save the saree...', ATM, Jul 28) was quite lightening take on the saree s drapes. The reason for the left-shouldered pallu is particularly interesting and logical. However the identity of saree per se is defined by the Nivi drape, making this six-yard garment both stylish and comfortable at the workplace and in daily chores. The saree is as distinct from unstitched garments like lungi or sarong as it is from shirt, pants or other stitched dresses. Manjari Bhowal, New Delhi

What is Zero Budget Farming?

The Idea | Zero budget farming is a set of methods that uses only natural (no chemical fertillisers/ pesticides) and locally available inputs. Farmers use a mix of core during, urine (only of desi cow dreed), jaggery and pute flour as primary soli nativities and rely only on local seeds. The aim is to eliminate input costs, raise productivity and boost income.
