IN BRIEF

CG Power seeks shareholders' nod to borrow up to ₹5,000 cr

Fraud-hit CG Power and Industrial Solutions has sought shareholders' nod to borrow up to ₹5,000 crore to meet working capital and other business needs as it looks to spring back from the worst crisis in its history. CG Power has called an annual general meeting of shareholders on December 14 where the

resolution for borrowing will be put to vote. In a notice to shareholders, the firm said its current borrowing as of March 31. 2019 is ₹2,455.3 crore (fund based including short term loans) and ₹1,380 crore (non-fund based). "Keeping in view the existing borrowing and additional fund requirements and given the current financial condition of the company, it is in urgent need of both long-term capital and working capital and towards this, the management of the company is in the process of identifying potential sources of capital," it said. PTI

NTT India sets \$1 bn revenue target in 2 yrs

Japanese technology major NTT has set a target of crossing the \$1 billion revenue target in the next two years from its India operations. This means the company that has been growing at an average of 18 per cent in top line income for the past eight years will have to ensure a better run rate in revenue growth, a top official has said. Currently, the overall India revenue of the company, which announced an integration of all businesses into a single entity recently, is over ₹5,000 crore (over \$700 million), according to the **PTI** official.

US-based Hines to invest \$500 mn in new projects

US-based realty firm Hines plans to invest \$500 million in India to develop new commercial and housing projects as it sees great opportunities for growth despite slowdown in the property market, a top company official said. Hines is a global real estate investment firm with a presence in 219 cities across 23 countries. It entered India in 2006 and has so far invested \$400 million equity for the development of six projects, of which two are already completed. **PTI**

Infy attrition check: 100% pay hike for 'power programmers'

Firm offering special quarterly skill-based bonus to high performers; attrition rate at present above 20%

Infosys'

BIBHU RANJAN MISHRA & SAMREEN AHMAD Bengaluru, 8 December

ith the attrition rate continuing well above 20 per cent, one of the highest in the segment, Infosys is on a drive to reimagine the way it engages with employees starting from the time of recruitment itself. The Bengaluru-based company is using digital technologies in order to simplify recruitment, provide faster career track to employees, and incentivise people with top skills.

The firm, for example, has started a programme to fast-track career growth of freshers by identifying them early. Under this programme, the company is picking top 5 per cent of performers after the end of the training period and these candidates are given preference over others while evaluating them for next promotion.

Digital Tag, another programme it has launched, looks at identifying people with digital readiness, and inventivise them for their skills and proficiency. An employee can earn 'Digital Tag' based on his or her proficiency in any of the 32 digital skills and four niche skills the company has identified after

project works, and internal certification programmes. Ever since it was introduced two quarters ago, Infosys is offering special quarterly skill-based bonus to these employees whose number stand around 2,000, according to Krish Shankar, executive vice-president and group head of human resources, Infosys.

"Over the past 2-3 years, we have going through training programmes, reimagined many of our internal

processes," said Shankar. "We operate in a fast-paced and dynamic industry. There has been a rise in the number of automation and agile projects. New technologies are now coming in. Hence, the process of managing and training talent is also changing.'

The company is looking at doubling the number of recruits from tier-I engineering colleges such as IITs and NITs to

enrich its talent base. These candidates who are offered twice the salary as compared to regular campus recruits, join as 'power programmers', a term that has been internally coined by the company to recognise the top coders. Last year, the number of recruits from the tier-I engineering colleges stood at 500. The company expects this number will double every year.

Other than fresh recruits, the 'power programmer' initiative is also open to existing employee base who get selected through internal coding contests or hackathons. "Once they become power programmers, their salary gets doubled. We are seeing the number of power programmers doubling every year," Shankar said. According to the company, many of these initiatives were taken based on an internal survey, wherein the majority of the employees said they valued 'career development' as the single most important factor to continue to stay motivated and work with the company.

Infosys is expecting its fresher hiring to go up this year. "The (fresher hiring) numbers are growing over the last year," said Shankar, however, he did not divulge the exact number of people the company is planning to hire this year.

mercial borrowing (ECB), \$538 million came in through the approval route of ECB, showed the data. major borrowers tapping the automatic route included Muthoot Finance (\$400 million), HPCL-Mittal Energy (\$300 million), Wardha Solar (Maharashtra) (\$251 million), Larsen and Toubro (\$200 million). profitable company by the end of 2020, a top company official said. "In a year's time, we should be a profitable company. We have been able to reduce our cash burn by around 70 per cent from what it was seven months ago,' Zomato founder and CEO Deepinder Goval. The company's current cash burn is \$15 million per month, he added. Earlier in October, Zomato had said it has witnessed over threefold jump in revenue to \$205 million (around ₹1,458 crore) for April-September 2019 from \$63 million (around ₹448 crore) in the same period a

position in the premium segment with the brand

Mumbai, 8 December

Bajaj Auto is aiming to cement its position in the premium segment with the launch of the Husqvarna Motorcycle brand amid slowing sales in the broader motorcycle market.

Like KTM Motorcycle, the Pune-based firm is expecting the 103-year-old Swedish brand to create a segment in the motorcycle market and become a volume spinner in its niche portfolio of motorcycles created over the past decade, said a top official.

"Over the medium term — in three years from now — we expect Husqvarna to become as big a brand as KTM is today," said Sumeet Narang,

Auto. The unit manages company's premium motorcycle vertical.

Husqvarna Motorcycle is part of the KTM AG group, in which Bajaj Auto owns a 48 per cent stake. On Friday, Bajaj Auto unveiled the Vitpilen 250 and Svartpilen 250 models from Husqvarna's stable.

KTM's India volumes have grown by over 35 per cent in the first seven months of this financial year. This is at a time when the overall two-wheeler market has been on slippery ground. It skidded 16 per cent to 11.45 million units over the same period a year ago, according to Society of Indian Automobile Manufacturers (Siam)

The Husqvarna models will go on sale from February next year and retailed through 500 Probiking outlets. Narang's immediate focus will be to establish the brand. The twin models address the needs of those seeking practicality as well as in India, said Valentini.

For Husqvarna, which has identified

India as a strategic market for its range of street bikes, the entry here is a ticket to overtake Triumph and Ducati as the third-largest European brand in the world, said Federico Valentini, global marketing head at Husqvarna.

"Currently, as a European brand KTM is the largest and BMW the second-largest, followed by the Ducati and Triumph. Our ambition is to be the third-largest European brand. The entry into India and expansion into Latin America and Southeast Asia in that sense is strategic," he said. Husqvarna sold a record 48,555 units last year. Of these, 30,000 were racingmotorcycles and the rest were street bikes. In India, Husqvarna is looking to tap into the white space between the sports and cruiser segments of the motorcycle market

Shoppers Stop launches two more store formats after premium rejig

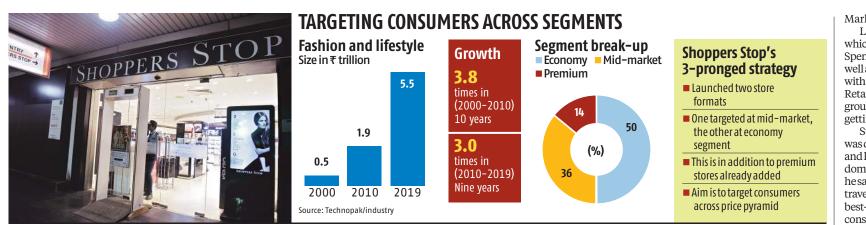

VIVEAT SUSAN PINTO

Mumbai, 8 December

Shoppers Stop, the country's oldest department chain, has launched two more store formats, even as it taps wellheeled consumers with luxury outlets. The two new stores are aimed at the midmarket and economy retail segments, allowing the three-decade-old chain to play across the price pyramid.

The luxury stores, for instance, will sit at the top and will be located in affluent areas of a city. The second retail format will target middle-class localities within a city while the third format will eye consumers on the outskirts of a city.

The Delhi-NCR is the first place where Shoppers Stop is test-marketing this three-tier retail structure. The company has launched its store for midpriced apparel and non-apparel brands in Vasant Kunj, New Delhi. A separate store carrying an affordable range has been unveiled at Gaur City, Noida. The luxury store from Shoppers Stop was launched last month at Golf Course Road, Gurugram. The retailer will take a similar approach in Mumbai and some other top metros, Rajiv Suri, managing

director and chief executive officer, Shoppers Stop, said.

PTI

'The strategy of one-size-fits-all for store launches will not work with affluence levels varying across different parts of a city," he said, adding, "The profile of the customer in the surrounding area of a store will have to reflect in the product mix and ambience. We are keeping this in mind when setting up our outlets."

Typically, the average selling price of

products in a Shopper Stop luxury storewill be nothing less than ₹4,000-5,000 per unit, depending on the category. Highend labels such as Michael Kors, Kate Spade, and Coach in handbags, Jo Malone and Tom Ford in beauty and Armani Exchange and Jones New York in apparels will be available here, Suri said.

The store targeted at the mid-market segment would have an average selling price of ₹1,600-2,000 per unit, with some of Shoppers Stop's private brands

available at these locations. The entrylevel stores will see products priced below ₹1,000 per unit. In some categories, the average selling price (for affordable products) could vary between ₹1,300 and ₹1,500 per unit.

Shoppers Stop has also hired two separate design companies to work on its store formats. The luxury stores, for instance, have been designed by the London-based company Dalziel and Pow. The mid-priced and economy range

stores have been conceptualised by the Dusseldorf-based design firm Schwitzke.

According to experts, the store segmentation approach that Shoppers Stop is taking is intended to improve its hit rate at a time when local and international fashion retailers are crowding the market with new merchandise across price points. In the past two months, global brands such as Uniqlo have entered India, joining the likes of H&M, Zara and

Marks and Spencer.

Local majors such as Reliance Retail, which has a tie-up with Marks and Spencer and other international labels, as well as Trent (which has a joint venture with Zara), Aditya Birla Fashion and Retail (runs Pantaloons chain) and Future group (Central and Brand Factory) are all getting aggressive.

Suri said the three-tier retail model was devised after studying the fashion and lifestyle market carefully. "The domestic retail market is evolving fast,' hesaid. "The premium consumer is travelling across the world and wants the best-in-class product. The middle-class consumer, on the other hand, is aspirational. We have to ensure that we give each what they want," he said.

Shoppers Stop's luxury store in Gurugram, for instance, houses a Starbucks outlet, a Hamley's toy store, a Crossword book store and an exclusive section for beauty products. This is in addition to apparels and accessories for men, women and children. However. the mid-priced and economy formats will be devoid of these trappings, said Suri, with the emphasis on enriching the value of a purchase for the consumer.
