TVS launches maiden EV scooter iQube

SPECIAL CORRESPONDENT

Motor Company launched its maiden EV scooter, iQube Electric, here on Saturday. The new green and fully connected scooter, which comes with a road price of ₹1.15 lakh can attain speed of 78 kmph and last 75 km on a fully top-up battery.

Chairman Venu Srinivasan said the firm would make 1,000 units of iCube Electric scooters a month, to start with. "Young people today are digitally driven and want to stay connected. We want to cater to their aspirations through this new product," he said.

TVS has entered into a partnership with energy provider Bescom to make charging stations available across the city. Charging facilities are available at 10 of dealerships Bengaluru.

ICICI Bank net zooms as provisions fall

Essar Steel resolution boosts Q3 profitability; gross slippages remain elevated, but recoveries help

SPECIAL CORRESPONDENT

Private sector lender ICICI Bank's net profit surged 158% to ₹4,146 crore for the October-December quarter as provisions for bad loans halved.

Provisions, excluding taxes, declined by 51% year-onyear to ₹2,083 crore during the period under review, from ₹4,244 crore in the year ago period.

The bank benefited from the resolution of Essar Steel during the quarter, which boosted profitability.

Net interest income (NII) increased by 24.3% year-onyear to ₹8,545 crore, which helped the core operating profit (profit before provisions and tax, excluding treasury income) to swell 23.8% to ₹7,017 crore.

The net interest margin (NIM) was 3.77% in Q3 of FY20, compared with 3.64% in the quarter ended September 30, 2019 (Q2-FY20)

I II alla Turrara		
High Jump		(In ₹crore)
	Q3 FY20	Q3 FY19
Net Profit	4,146	1,605
NII	8,545	6,875
Provisions	2,083	4,244
Operating Profit	7,549	6,146
Gross NPA ratio	5.95%	7.75%
Net NPA Ratio	1.49%	2.58%
Capital Adequacy Ratio	16.5%	17.15%

During the quarter there was a certain development with respect to a broking company. Our exposure to the company has been classified as non-performing

and 3.4% in Q3-FY19

The gross slippages to NPA $\,$ remained elevated though recoveries, and write-offs helped to contain the net slippages number.

During the quarter, the gross additions to NPAs were

₹4,363 crore. Recoveries, upgrades and other deletions, excluding write-offs, from non-performing loans were ₹4,088 crore in Q3-2020.

Asset quality improved, with gross NPA ratio declining to 5.95% as on December 31, 2019, as compared to 7.75% a year ago, and 6.37% in the previous quarter end.

Provision coverage

The provision coverage on non-performing loans, excluding cumulative technical write-offs, increased from 68.4% at December 31, 2018 to 76.2% at December 31,

"During the quarter, there was [a] certain development with respect to a broking company. Our exposure to the company has been classified as non-performing. The corporate NPA addition in this quarter also included a south India-based industrial company, where servicing was regular, but refinancing undertaken in 2018 has now been assessed to be restructuring, leading to classification of NPA by lenders. The company is backed by reputed promoters and investors," Sandeep Batra, president, ICICI Bank, said in the post earnings interaction with the media. As at December 31, 2019, the fund-based and non-fund based outstanding to borrowers rated 'BB' and below was ₹17,403 crore, compared with ₹17,525 crore at March 31, 2019 and ₹16,074 crore at September 30, 2019.

The domestic loan growth was at 16% year-on-year on December 31, 2019, driven by retail loans, which grew by 19% year-on-year. Domestic corporate portfolio grew by 12% year-on-year.

Total deposits increased by 18% and the term deposits grew by 24% year-on-year, while the current and savings account (CASA) deposits grew by 15%. The share of CASA in total deposits was 42.8% in quarter ended December.

The bank's balance sheet crossed the ₹10 lakh-crore milestone, with total assets at ₹10,07,068 crore.

NSE bench orders refund in 2018 case

'Client must get time for

ASHISH RUKHAIYAR

In an important order, the Arbitration Appeal Bench of the National Stock Exchange (NSE) has ruled that a broker cannot square off a client's position without proper notice even if the client's margins fall below the required level due to a sudden fall in stock prices.

The order assumes significance as many clients approach the exchanges with similar complaints against brokers who, they say, sell their shares without giving sufficient time to bring additional margin if required.

The bench ordered the entire amount of loss to be refunded to the client along with interest from the date

As per the order, CD Equisearch has been directed to pay ₹1.23 lakh along with 9% interest to Suwarna Choudhary after the investor filed an appeal alleging that the broker sold her securities to meet the margin shortfall without giving time to bring in additional margin.

The matter dates back to September 2018, when the client had ₹1.23 lakh as margin, based on which she bought one lot each of Maruti Suzuki India and Canara Bank in the derivatives segment.

der, the broker sold the lot on the same day due to a sudden fall in prices and post the 'forced' sale, the market recovered and closed at a much higher level than the price at which the position was squared

Further, she alleged that the regulations allowed a broker to sell the securities only if the client was not able to deposit the required margin 'within the next trading day'.

"Broker has to inform their client of the shortfall in margin calculated at the end of the day. And even after intimation/notice, if a client fails to pay additional margin as levied by the broker next day, then the broker can sell off the client's open position, otherwise not," Bhalchandra Ganu, the lawyer for the complainant,

There have also been rulings by the Bombay High Court that a broker cannot square off the client position without giving sufficient time to bring additional margin. "The requirement of intimation and approval has been held to be sacrosanct before an open position is closed out by broker," said Sumit Agrawal, Partner, Regstreet Law Advisors.

"In recent years, while SEBI has come up with a lot of circulars to deal with unauthorised trades that puts clients at risk, it should now consider looking at recasting Stock Exchange Byelaws and Rules, which are ambiguous in various provisions,' said Mr. Agrawal, who had earlier worked in the legal department of SEBI.

Rolls-Royce launches Black Badge Cullinan

The model is priced at ₹8.2 cr. in India

SPECIAL CORRESPONDENT

Rolls-Royce Motor Cars, a wholly-owned subsidiary of the BMW Group, has introduced the Cullinan in India, thus completing its Black Badge family of cars. The Cullinan is priced starting ₹8.2 crore.

The super-luxury vehicle caters to a new group of younger and adventurous Rolls-Royce customers, the company said. The vehicle's 6.75-litre V12 engine now delivers increased power (600PS) and torque (900NM) offering enhanced performance.

"Black Badge reflects the desires of a distinct group of

Are regulations a boon or bane for tech?

Google CEO's pitch to regulate AI has stirred up a debate among industry leaders

YUTHIKA BHARGAVA

Amid renewed debates over regulation of newer technologies such as artificial intelligence (AI), the Indian tech industry is of the view that while some regulations may be needed to keep a check on tech, putting up too many barriers may stifle innovation. This comes in the aftermath of Google CEO Sundar Pichai pitching for regulation of artificial intelligence, in a recent article in a finan-

cial daily, In a discussion with The Hindu on 'Tech in 2020s', Nasscom senior vice-president and chief strategy officer Sangeeta Gupta said, "From Nasscom's perspective, you have to give some You have to give some time for these technologies to mature before regulating

SANGEETA GUPTA

time for these technologies to mature before you start regulating, because if you start coming up with AI ethics policies, even before AI becomes a little more mainstream, you're going to potentially create an environment where many of these things don't even take off. The regulatory sandbox approach that is being suggested is one good way to think about newer technologies."

Jagdish Mitra, chief strategy officer and head of

growth at Tech Mahindra, pointed out that one can only regulate something when one has an assessment of 'good' or 'bad'. "Who's deciding whether this is good for the society or bad for the society? Will people, who have not experienced it, sitting in courtrooms, decide, or will the common citizen?"

Mr. Mitra said that governments would have to create a mechanism to listen to stakeholders.

"Starting from a place where you're always worried that this will only do bad, is the wrong way to start. You'll have to start from a point that says that this can do good. Therefore when it starts to act itself out, you will have a set of people rais-

Triumph, Bajai

British company Triumph Motorcycles and Bajaj Auto have entered into a longterm, non-equity partnership to develop and manufacture a new range of midcapacity Triumph motorcycles in India and for selling globally.

The first product from this partnership, to be manufactured at Bajaj's Chakan plant, will hit the market in 2022. Financial details were not revealed.

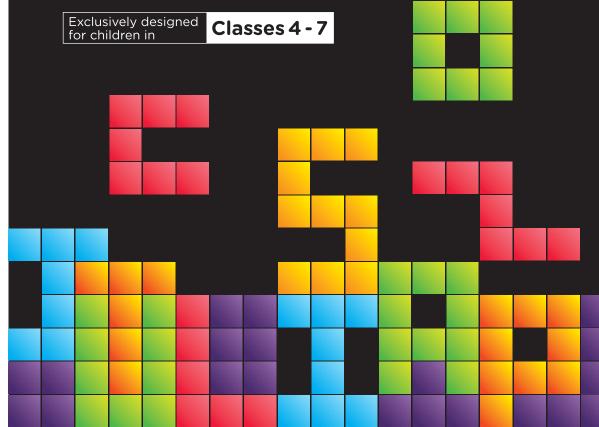

Triumph, which sells 60,000 units a year, will see volume growing substantially as this partnership will offer mid-sized products in high-volume emerging markets, including India. Bajaj will become one of Triumph's key distributors in new markets

umph's Indian distribution activities at a date yet to be confirmed. In other key overseas markets where Triumph is not present, Bajaj will represent Triumph.

folio and be distributed by Triumph's dealer network worldwide. Bajaj Auto MD Rajiv Bajaj said the company opted for this partnership because Bajaj was not cess. Triumph had earlier tried to develop mid-range bikes, but failed to achieve

What will your capital expenditure be?

■ We will be investing close to ₹500 crore over the next five years on capital expenditure, to make synthetic and non-leather products and ladies shoes.

This calls for setting up new lines of production, upgrading existing ones and doubling the workforce at our Ranipet facility to 15,000 people. Right now, women employees comprise 80% of total workforce.

We have manufacturing facilities in Ranipet that make 5 million pairs of footwear a year, followed by units in Ambur and Chennai that make one million pairs each, respectively. Our unit in Chittoor in Andhra Pradesh is a small facility that of the economic slowdown on our business. We produced four million pairs of footwear in FY18 and this rose to 4.5 million pairs in FY19
